

Target Detection Device (TDD) shrouds (MDE). Also included are MK 13 MOD 0 Vertical Launching System (VLS) canisters; MK 104 Dual Thrust Rocket Motors (DTRM) with MK 750 DTRM shipping containers; MK 14 Fuze Test Coupler (FTC); SM-2 component parts, spares, and containers; and additional U.S. Government and contractor engineering and technical and logistical support services. The MDE value remains \$216 million. The total overall value will increase to \$320 million.

(iv) Significance: The TDD is a hardware component of a completely assembled SM-2 Block IIIB missile and thus not listed in the previous notification. This proposed sale will provide additional TDDs as spares. The Royal Australian Navy (RAN) intends to use the SM-2 sections, components, and spares to continue maintenance of their SM-2 Blk IIIB inventory.

(v) Justification: This proposed sale supports the foreign policy and national security objectives of the United States by improving the security of a Major Non-NATO Ally that is a key partner of the United States in ensuring peace and stability around the world.

(vi) Sensitivity of Technology: The MK 45 MOD 14 Target Detection Device (TDD) is a component of the SM-2 Block IIIB missile's warhead/ordnance section that detects targets and activates the fuze.

The highest level of classification of defense articles, components, and services included in this potential sale is CONFIDENTIAL.

(vii) Date Report Delivered to Congress: August 3, 2021.

ARMS SALES NOTIFICATION

Mr. MENENDEZ. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive prior notification of certain proposed arms sales as defined by that statute. Upon such notification, the Congress has 30 calendar days during which the sale may be reviewed. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Senate Foreign Relations Committee.

In keeping with the committee's intention to see that relevant information is available to the full Senate, I ask unanimous consent to have printed in the RECORD the notifications which have been received. If the cover letter references a classified annex, then such annex is available to all Senators in the office of the Foreign Relations Committee, room SD-423.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

DEFENSE SECURITY
COOPERATION AGENCY,
Arlington, VA.

Hon. ROBERT MENENDEZ,
Chairman, Committee on Foreign Relations,
U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 21-48 concerning the Army's proposed Letter(s) of Offer and Acceptance to the Government of Georgia for defense articles and services estimated to cost \$30 million. After this letter is delivered to your office, we plan

to issue a news release to notify the public of this proposed sale.

Sincerely,

HEIDI H. GRANT,
Director.

Enclosures.

TRANSMITTAL NO. 21-48

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) Prospective Purchaser: Government of Georgia

(ii) Total Estimated Value:

Major Defense Equipment* \$25 million.

Other \$5 million.

Total \$30 million.

Funding Source: National Funds.

(iii) Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:

Major Defense Equipment (MDE):

Eighty-two (82) Javelin FGM-148 Missiles.

Forty-six (46) Javelin Command Launch Units (CLU).

Non-MDE: Also included are Enhanced Producibility Basic Skills Trainers; Missile Simulation Rounds; Security Assistance Management Directorate Technical Assistance; Tactical Aviation and Ground Munitions Project Office Technical Assistance; other associated equipment and services; and other related elements of logistical and program support.

(iv) Military Department: Army (GG-B-UDW).

(v) Prior Related Cases, if any: GG-B-ZZY.

(vi) Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None.

(vii) Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold: See Attached Annex.

(viii) Date Report Delivered to Congress: August 3, 2021.

*As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Georgia—Javelin Missiles

The Government of Georgia has requested to buy eighty-two (82) Javelin FGM-148 Missiles; and forty-six (46) Javelin Command Launch Units (CLU). Also included are Enhanced Producibility Basic Skills Trainers; Missile Simulation Rounds; Security Assistance Management Directorate Technical Assistance; Tactical Aviation and Ground Munitions Project Office Technical Assistance; other associated equipment and services; and other related elements of logistical and program support. The estimated total cost is \$30 million.

This proposed sale will support the foreign policy and national security of the United States by improving the security of Georgia which is a strategic partner and a key contributor to security and stability the region. The Javelin system will help Georgia build its long-term defense capacity to defend its sovereignty and territorial integrity in order to meet its national defense requirements.

The proposed sale will improve Georgia's capability to meet current and future threats by increasing its anti-armor capacity. Georgia will have no difficulty absorbing these weapons into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Raytheon/Lockheed Martin Javelin Joint Venture of Orlando, Florida, and Tucson, Arizona. However, these articles are being provided from U.S. Army stock. There are no known offset agreements proposed in conjunction with this potential sale.

Implementation of this proposed sale will not require the assignment of any U.S. Gov-

ernment or contractor representatives to Georgia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

TRANSMITTAL NO. 21-48

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex Item No. vii

(vii) Sensitivity of Technology:

1. The Javelin Weapon System is a medium-range, man portable, shoulder-launched, fire and forget, anti-tank system for infantry, scouts, and combat engineers. It may also be mounted on a variety of platforms including vehicles, aircraft and watercraft. The system weighs 49.5 pounds and has a maximum range in excess of 2,500 meters. The system is highly lethal against tanks and other systems with conventional and reactive armors. The system possesses a secondary capability against bunkers.

2. Javelin's key technical feature is the use of fire-and-forget technology, which allows the gunner to fire and immediately relocate or take cover. Additional special features are the top attack and/or direct fire modes, an advanced tandem warhead and imaging infrared seeker, target lock-on before launch, and soft launch from enclosures or covered fighting positions. The Javelin missile also has a minimum smoke motor, thus decreasing its detection on the battlefield.

3. The Javelin Weapon System is comprised of two major tactical components, which are a reusable Command Launch Unit (CLU) and a round contained in a disposable launch tube assembly. The CLU incorporates an integrated day-night sight that provides a target engagement capability in adverse weather and countermeasure environments. The CLU may also be used in a stand-alone mode for battlefield surveillance and target detection. The CLU's thermal sight is a second generation Forward Looking Infrared (FLIR) sensor. To facilitate initial loading and subsequent updating of software, all onboard missile software is uploaded via the CLU after mating and prior to launch.

4. The missile is autonomously guided to the target using an imaging infrared seeker and adaptive correlation tracking algorithms. This allows the gunner to take cover or reload and engage another target after firing a missile. The missile has an advanced tandem warhead and can be used in either the top attack or direct fire modes (for target undercover). An onboard flight computer guides the missile to the selected target.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary obtains knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Georgia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Georgia.

ARMS SALES NOTIFICATION

Mr. MENENDEZ. Mr. President, section 36(b) of the Arms Export Control
